

## Press Release

### New ESRG-brochure “Together for less - Innovative Solvent Recycling”

The European Solvent Recycler Group (ESRG) is pleased to announce the release of a new brochure, “Together for less - Innovative Solvent Recycling”. This illustrates ESRG members support of the European Union’s Circular Economy policy and associated new European Green Deal. The recycling of solvents contributes significantly to both environmental protection and sustainability objectives while delivering a cost savings benefit.

By reducing the need for replacement new solvent production, the recycling of solvents importantly contributes to not only saving natural resources, but also by avoiding wasting energy and its related amounts of production CO<sub>2</sub> when compared with the carbon footprint of virgin solvents.

The new brochure can be found on the ESRG-Website ([→Link](#)) together with a range of other useful information. The brochure will also be sent on request via the ESRG-Secretariat.

Brussels, Cologne February 5<sup>th</sup> 2021

---

*The ESRG was founded in 2004 under the aegis of the German Association for Chemical Distributors (VCH) joining professional members engaged in a wide range of solvent recovery activities. The group’s aim is to promote the safe and economic management of post-use solvents.*
